INGREDIENTS

Aqua (Purified Water) Glycerin, Propylene Glycol, Betaine, Hibiscus Esculentus Fruit Extract, Propanediol, Salvia Sclarea (Clary) Extract, Cichorium Intybus (Chicory) Root Oligosaccharides, Caesalpinia Spinosa Gum, Sodium Benzoate, Gluconolactone, Calcium Gluconate, Alcohol, Malva Sylvestris (Mallow) Extract, Mentha Piperita (Peppermint) Leaf Extract, Primula Veris Extract, Alchemilla Vulgaris Extract, Veronica Officinalis Extract, Melissa Officinalis Leaf Extract, Achillea Millefolium Extract, Chondrus Crispus Extract, Phenoxyethanol, Prunus Amygdalus Dulcis (Sweet Almond) Seed Extract, Hydrolyzed Soy Fiber, Hydroxyethylcellulose, Leuconostoc/Radish Root Ferment Filtrate, 1,2-Hexanediol, PEG-40 Hydrogenated Castor Oil, Sodium Polyacrylate, Xanthan Gum, Fragrance (Parfum)

PRUNUS AMYGDALUS DULCIS (SWEET ALMOND) SEED EXTRACT

Our Sweet Almond Peptide is an innovative ingredient that contains firming protein polymers with a pioneering technology. Sweet Almond Peptide is a high molecular weight (greater than 500,000 DA) Biopolymer made from sweet almond proteins. These large proteins are perfect for adhering to the skin and forming a stable, pliant and lifting film. Sweet almonds also known as Prunus Amygdalus Dulcis, come from the Prunus Amygdalus tree and are considered an excellent emollient, as they help the skin balance its moisture levels while softening and soothing. Sweet almond products are typically odourless and may act as an anti-inflammatory. Sweet almond peptides have a fine texture that leaves the skin feeling satiny and smooth, and won't clog the pores.

GLYCERIN

Glycerin is present in all natural lipids (fats), whether animal or vegetable. Glycerin is a skin-replenishing and restoring ingredient, meaning it is a substance found naturally in skin. In that respect it is one of the many substances in skin that helps maintain a healthy look and feel, defending against dryness. Glycerin is also one of the best moisturizers on the skin. Since glycerin has humectant properties, the retention of water inside the skin layer is possible. It also has hygroscopic characteristics which can make the skin absorb water from air while removing dry and dull marks on the skin. This is perfect to use especially during winter when the skin tends to become dry. Your skin will remain nourished, gentle and moisturised and the skins normal protective barrier function will be restored.

BETAINE

Primarily functions as a humectant and anti-irritant in cosmetic products. The small polar molecules of this ingredient are prone to hydrogen bonding (AKA interacting with water), which in turn gives it the ability to retain moisture. It's able to give superior hydration to the skin, without the residual stickiness often associated with glycerin based emulsions. When used in skin care products, it can temporarily decrease the depth of wrinkles, giving the face a much smoother appearance.

BIO-CELLULOSE

Bio-cellulose was originally manufactured solely for medical applications to treat burns and chronic wounds. Bio-Cellulose utilizes the most advanced mask technology and microbial engineering, to deliver beneficial nutrients into the dermis, instantly locking moisture into the skin enabling optimal release of treatment essence for maximum penetration of the key ingredients.

Eco Friendly & 100% Biodegradable

No Skin Irritation

DIRECTIONS FOR USE

Take the masks from packaging, unfold carefully and remove protective layers A.

2. Apply exposed mask Layers B onto cleansed breasts.

3. Remove protective Layers C, adjust masks and press lightly to ensure optimal adhesion.

4. Remove masks after 20 minutes and pat the remaining essence into skin.
